PRESS RELEASE

The attention of the National Youth Council has been drawn to issues of public disorder that has led to the lost of lives and destruction of property in the city of Makeni, emanating from an attempt by EDSA to relocate a 1.65 Mega Watts thermal power generator to Lungi in the North-West Region after a consultative meeting with stakeholders.

We would like the general public to know that, we as National Youth Council and District Youth Councils right across the Country, believe in transforming the lives of young people in this country through engagement, Negotiations and Advocacy to ensure positive outcomes.

We (NYC and DYC'S) therefore condemn all forms of violence and attack by young people in this Country.

However, we (NYC and DYC'S) sympathized with the families of all the Youth who lost their lives in such an unfortunate incident, and we are encouraging and advising all youth to stay out of violence and stay calm.

Tejan Z Kellah
Chairman
National Youth Council
