

— For the staff.

I want to let the world know what MFMR has done for me. I have been in business in Sierra Leone for many years and employ over 400 people. The people at MFMR are people who put their own interests ahead of right and wrong and have no knowledge of fishing. MFMR detained three of my ships for nine months, saying they were investigating illegal fishing MFMR investigated for nine months, found no evidence, and released the three ships nine months later with no apologies or regrets. Also, two ships were stolen from thieves when they were detained in MFMR. MFMR also avoided responsibility for the stolen vessel when both were detained, and there was no apology. And MFMR fined the vessel \$4.2 million without proof, despite the fact that the ship cost \$200,000. Our vessel has been detained for 4 months without evidence. And MFMR fined our vessel an additional \$1.5 million for just touching the IEZ line 12 miles from shore. I have been to MFMR on several occasions, and the Minister .Deputy Minister .PS. director. Deputy Director I had a meeting and I strongly said several times that you should synchronize your VMS and the GPS on our vessel, but they just laughed at me. They never commented on their wrongdoings. The quality of the fisheries management department in Sierra Leone is really bad. Finally, what I want to say to the world is not to think about investing in Sierra Leone. If you decide to invest in Sierra Leone, you are wasting your money. Because it is a place where there is neither justice nor faith nor trust. I've spent a lot of time and money helping people in need in this country for 30 years, but the government of this country doesn't recognize it

at all and rather tries to kill me more. MFMR treated me unfairly for a year and a half. And I lost everything. . I think MFMR was trying to kill me for a year and a half. I spent a lot of time figuring it out, and my conclusion was confirmed to be due to a feud between the employees working at MFMR. They are people who say that even the wrong things are right in front of money. They are also people who argue that what is right is wrong in front of money. It doesn't matter what's right or wrong for them. Just thinking about money.

Finally, if the MFMR were to be operated in this way, it could benefit individuals, but the country's development would be set back.

With my death today, I want to let the world know about my injustice.
